SYSTEM'S ENERGY EASEMENT PROGRAM

The University of Alaska System is pleased to announce the availability of energy easements at little cost to agencies and utility partners. Recognizing that all public and private utilities across Alaska are facing increasing energy costs, we believe it is important to remind our partners of the easement program and to ensure fair market compensation.

As a public land grant educational institution, University of Alaska (UA) is required to charge fair market value for any

energy easement. The University of Alaska System's Energy Easement Program is a voluntary program that provides a fair market value for energy easements on UA properties, which has been a long-standing practice. I hope this

program will help us, and prevent future surprises of potential

energy easements on UA properties, which has been a long-standing practice. I hope this

program will help us, and prevent future surprises of potential

energy easements on UA properties, which has been a long-standing practice. I hope this

program will help us, and prevent future surprises of potential
